Jakarta EE 9 (25 minutes)

• Kevin Sutter led the discussion on this topic.

- The following is a link to the Jakarta EE 9 Status doc that we discussed at last week's Steering Committee meeting and reviewed in detail on April 14:
 - https://docs.google.com/document/d/1e6s7ku8YtDw4xQYba6Mli0-UA4tO-eZh6D 32ZjhYfBM/edit?usp=sharing
- Based on input during the review at the Spec Committee, Kevin requested that, in addition to the current overall Jakarta EE 9 status agenda item, that two additional items be added to the Steering Committee agenda to track the progress of:
 - Eclipse Glassfish 6.0 (compatible implementation) and
 - Jakarta EE 9 Platform TCK.
- All three of these are very much related, but we have different people or organizations driving the efforts. It was suggested that:
 - Steve Millidge or potentially Eliot Martin could report on the Eclipse GlassFish 6.0 implementation status
 - The TCK Dev team nominate someone to report on the Platform TCK status
- There is a proposal at the end of the doc which states an alternative to the June 2020 delivery date.
 - Proposal for Steering Committee: Move final release of Jakarta EE 9 out to Fall 2020 (leaving it open to line up either with CodeOne or EclipseCon). But, continue to push for a Milestone or Release Candidate release for Jakarta EE 9 in June 2020.
 - This will allow some of the early Wave candidates (not dependent on the Platform) to continue the work to complete their releases.
 - This Milestone or Release Candidate release will not be 100% TCK compliant, but should be far enough along to show solid progress (80% successful).
 - Encourage tool vendors to pick up this preliminary release to shore up support for Jakarta EE 9 in preparation for the official Fall release.
- The consensus of the Steering Committee was that, while the June 2020 data appears
 aggressive and unlikely to be achieved, and targeting a Milestone or Release Candidate
 release is a reasonable goal, that more data on the overall project status is required,
 including Spec status, Eclipse GF status, and TCK status, before defining a new

schedule and selecting a new final release date with a factual basis for the schedules. We will need to come back to this in the next Steering Committee meeting.

- Update on tooling:
 - Ownership for tooling vendors being tracked below:
 - https://docs.google.com/spreadsheets/d/1uYyX43aNIQgZfjuSeBjr4LGCEH4sBilHgKGSOWrcEuc/edit?urp=gmail_link#gid=1810653774_
 - Per prior meetings David did an initial (not complete) scan/analysis of Spring jars in Maven Central for Java EE/Jakarta EE dependencies which suggests the potential impact of the API changes. See below.
 - https://docs.google.com/spreadsheets/d/1NOVFZhra4sRHsI1QMLVmCc D58RMD87RfP0WhVQq-PsM/edit#qid=1022962872
 - In the April 14 meeting, David indicated that he did not believe we would make progress engaging with tooling vendors until a Milestone Release was available.

Jakarta EE and MicroProfile (20 minutes)

 Mike Milinkovich had proposed the following resolution at the request of the Steering Committee, and had requested a vote by the Steering Committee in the April 7 meeting.

Resolved, that the Jakarta EE Working Group Steering Committee agrees in principle with the proposal to create a Cloud Native for Java Umbrella Working Group.

- The conclusion of the April 7 discussion was that the vote would be deferred until April
 14, at which time members should be prepared to vote and provide a 1-2 line summary
 of their comments.
- Will Lyons reworded the resolution to use the term "concept" to replace the term
 "proposal" to clarify whether there is agreement, or not, with the concept, leaving the
 details of the current proposal aside. The phrase, "initially comprising the Jakarta EE
 Working Group and the (to be formed) MicroProfile Working Group" was added to clarify
 the essential concept.

Resolved, that the Jakarta EE Working Group Steering Committee agrees in principle with the concept of creating a Cloud Native for Java Umbrella Working Group, initially comprising the Jakarta EE Working Group and the (to be formed) MicroProfile Working Group.

It was noted that the concept of such a Cloud Native for Java Umbrella Working Group has draft proposal which is provided for reference below, but a vote on the resolution above would not be a vote on the details of the current draft of the proposal

https://docs.google.com/document/d/1pV2n0iZkgdalOaaZMZuTmSPDyjVKZBS5gq7Y1-P RHU/edit

• Will Lyons moved for a vote on the resolution and after discussion there were no seconds to the motion. The resolution was tabled.
