 - <https://docs.google.com/spreadsheets/d/1uYyX43aNIQgZfjuSeBjr4LGCEH4sBilHqKGSOWrcEuc/edit#gid=0>
- All docs are in the Steering Committee folder, program plans. Q1 goal suggestions were reviewed and feedback was requested.
- Review Q1 goals.
 - Drive tooling support for Jakarta EE
 - Ownership for tooling vendors being tracked below:
 - https://docs.google.com/spreadsheets/d/1uYyX43aNIQgZfjuSeBjr4LGCEH4sBilHqKGSOWrcEuc/edit?urp=gmail_link#gid=1810653774
 - Drive acquisition of new working group members
 - Not practical for WG members to drive and report on membership recruitment in their customer base
 - Dan and Will meet to discuss backward compatibility goal

Jakarta EE 8 Follow-Up

- All known follow-up issues concluded
- Will reserve this as an agenda item for open issues on Jakarta EE 8

Jakarta EE and MicroProfile (no update)

See prior meeting minutes on this topic.

Release Cadence discussion (no update)

- Discussion about cadence of releases from Jan 14 (John C provided the following summary).
 - Spec projects can release at any cadence they can implement to.
 - John C. suggests that slower does not equate to a negative. Stability is also of concern - what cadence do Jakarta EE users want to absorb (based on how they have been deploying Java EE up to this point)?
 - TCK compatibility requirements also have details about how independent releases can be absorbed. We may need to change these requirements, to support flexibility that we want to achieve.
 - The committee would like to identify barriers to complete independence with respect to release schedules. Jakarta may provide opportunities for expanding this flexibility.
 - We could include questions about this in a survey to help refine the community input. There are many possibilities for accomplishing this.
 - Suggested that the committee adopt a statement (or resolution) recommending improvement in the frequency of releases and that we work to identify and perhaps relax requirements that make releases take longer. Then the subcommittees and committer working groups could be asked to provide feedback about their processes and requirements that could be changed to meet this goal.
- Discussion from last time
 - A plan for defining a release cadence should be informed by vendor requirements for releases
 - A release cadence plan should consider both a cadence for the Platform and a cadence for individual APIs
 - We need to define a relationship to compatibility requirements
 - It is difficult to define a release cadence plan without having completed a first release with changes (i.e. Jakarta EE 9)
 - We do not have a strawman/guideline for this to guide the discussion
 - Defining a release cadence/plan should be a Q2 goal
